Policy Making and Quantification of Health Impacts in England

John Kemm
Granada
13 April 2011
Policy making in England

• HIA not much used
• Dominant model of HIA non-quantified
• Health section of integrated impact assessment poorly completed
• Economists lead impact assessment
Public Service Agreement DH 1
(Labour administration)

Improve the health of the Population

• By 2010 increase life expectancy at birth in England to 78.6 years for men and 82.5 years for women
Equity and excellence
Liberating the NHS
(Conservative/Liberal Administration)

- Targets are out
- Outcomes are in
The SimSmoke Model of Tobacco Control Policies

David Levy, Ph.D.
Pacific Institute for Research and Evaluation

Presentation to Health Economics Workshop
Policy inputs to SimSmoke

- Cigarette taxation
- Restrictions on smoking places
- Mass media tobacco programmes
- Youth access
- Education programmes
- Cessation treatment
- Advertising restrictions
- Pack Warning labels
Thank you for listening
Ha, c'est sûr que ça va avoir un impact global sur la santé de la population ...

... mais êtes-vous certain qu'il soit positif ?
